BESCHRIJVING

White, bright and stylish elegance awaits you in our original studio, which can be rented as a conference room, a photo studio or as a gallery for exhibitions. Creative training sessions which introduce a team to the design thinking method are also possible here, as are seminars, training courses and conferences, the list is endless. The atmosphere that prevails in this large loft together with the surrounding creative district will help generate a wealth of ideas - ideal for innovative and new approaches such as design thinking workshops. Our conference room in Hamburg has proved very popular with conservative companies looking to try something new, as well as with advertising agencies and entrepreneurs.

The FilmFabrique Studio together with the FilmFabrique is based in the former goods station Oberhafen in the Hafencity. With its white columns it offers a strong contrast to the industrial charm of the area. The Oberhafen is a unique, large and free experimental space for some of Hamburg's creative projects and was recently dubbed the "most creative place in the city" by local paper the Hamburger Abendblatt. It is one of the few places in Hamburg that has not yet been cleaned up to look like everywhere else and has therefore preserved its originality and authenticity. Another local paper the Hamburger Morgenpost wrote that "Hamburg is as cool as New York here".

We're happy to provide you with any additional needs you may have, extra chairs and tables, a projector, flip charts and metaplan boards for your presentations, these are just a few examples, simply ask if you require anything special or out of the ordinary. Catering can also be provided for your guests, including drinks such as coffee, tea and water as well as a lunch. Separate toilet facilities are naturally also provided.

Free WiFi is also included and if you arrive by car, there are enough free parking spaces available.

The prices shown are for conferences, seminars and meetings.

Prices for other events on request.
